Why is our community left with run down houses with no one living in them? Why are people left looking for somewhere to live or why is there so many fucking homeless when we have houses that could be done up and have someone living in them. And new apartments with no one in them. Why? We have fuck all for the children in our community. Nothing. The only thing we have a lot of is fucking drugs. Again why? We need to give our children a chance. Get your shit together.
